instruction manual
ceramic table top

How to assemble table top

Required tools

Hex key 3

Wrench N°8

Parts

2x support plate

8x washer (a)

8x nuts M5 (b)

8x countersunk bolt M5 (c)

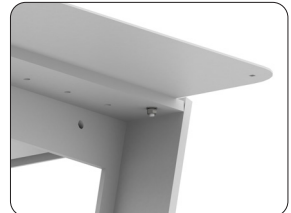

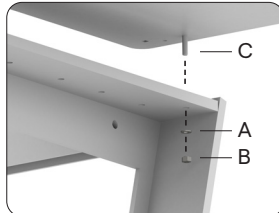

Installation

In order to ensure the strenght of the ceramic tabletop it is advised to attach the delivered support plates at the ends of the table support.

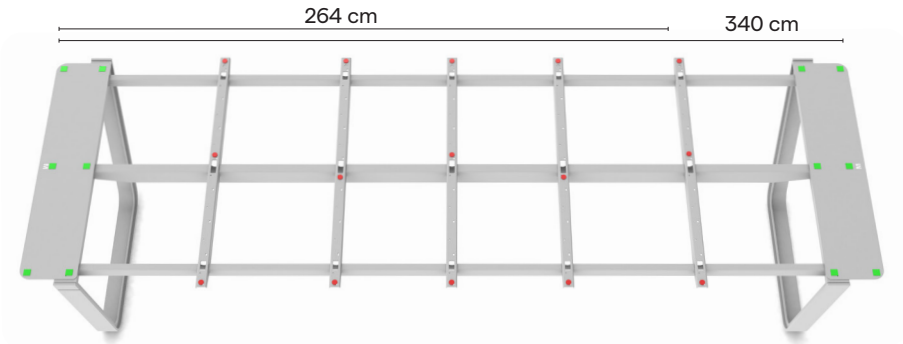

Each support plate has to be attached on 4 different places on the table support as indicated on the images. Repeat this step for the other side of the table.

Important remark: The pattern of the holes in the plates only match on one side with the holes in the table. So if it doesn't fit you should just turn the plate 180° and it will match.

Please make sure that all bolts are placed and fastened to insure proper stability of the assembly.

Bumper position

There are two different types of bumpers delivered in the plastic bags. Please place the bumpers as indicated on the above image.

12 pcs (for extension)		20 x 20 x 1.5 mm
15 pcs (340)		Ø 20 x 3.5 mm
12 pcs(264)		

Placing the table top

Warning: ceramic is a fragile material. It is highly recommended to carry the table top straight up as shown on the right image.
